### **Top 7 Reasons to Use The New BionicSil™**

#### **Patented New Technology**

**New technology has made BionicSil™ remarkably more effective than the old colloidal or ionic silvers. The new silver requires very small amounts, it's non-toxic, and is extremely safe.**

#### **Scientifically Supported**

**Numerous lab reports and research studies have documented the benefits of using silver. In fact, scientists have found that the new silver can destroy 99.9% of all bacteria, viruses, molds, fungi, and other pathogens. It begins to destroy pathogens within the first 15 seconds.**

#### **Super Flexible**

**BionicSil™ can be used inside the body (internal), as well as on the skin and in the orifices (external). The new silver can also be used as an effective household disinfectant, much like bleach or other cleaners --only it's much safer!**

#### **Quick Kill Time**

**BionicSil™ can be effective in just a few minutes. Research shows that exposing silver to most pathogens (including fungus and mold) for only 3-6 minutes will kill them.**

#### **Inexpensive**

**When you add up the cost of doctor visits (and the time to see the doctor), prescription medications, and other factors involving "conventional" health care, BionicSil™ is a tremendous value.**

#### **Emergency Preparedness**

**Because BionicSil™ is inorganic with no chemicals or other additives, it can be stored for years at a time. Several agencies and organizations have recommended the use of silver as a potential agent in the fight against bioterrorism.**

#### **Extremely Safe**

**Research, testing and long term use prove that the new silver is completely safe for everyone, including children and the elderly.**
