

Natur~Pur™

**Organic Coral Calcium
& 73 Trace Minerals
in a perfect balance
made by nature just**

Organic Minerals ~ Highly Absorbable
pH Balance

Why A Body Needs Coral Minerals

Some doctors say that 157 diseases are caused by mineral deficiency. Minerals make up the basic foundation of health. Our soils have become depleted of minerals, thus, our bodies and our foods have become mineral deficient. Coral naturally contains every mineral found in the body and unlike most mineral supplements, coral minerals are easily absorbed, efficient and really work. **They're SAFE for Animals, Children & You !**

Where Does Coral Come From?

Solutions-4-you® coral is harvested from above the sea. Thousands of years ago this coral was a thriving coral reef. Geologically, this coral was pushed up above sea level, free from the ocean pollution of the industrial era. Our coral is also purified with ozone and not a high heat method.

Solutions-4-you® respects the fragile state of the under water coral reefs and ocean environment. Un-fortunately, many companies do take the dead and living coral from under the ocean surface. By dredging the ocean floors, it totally devastates the ocean ecology and is detrimental to the dead and living coral reefs. Coral larvae propagate in the dead coral debris and any disturbance directly affects the life of the living reef.

How To Take Coral Calcium

The Easy & Naturally Pure Way

Solutions-4-you® now offers you **Natur~Pur™** Coral Calcium in easy -to-use powder form. There are NO additives, fillers or preservatives that you may find in most capsules. Our coral calcium comes from Okinawa, Japan and is ultra -fine and virtually tasteless. Purchasing powder instead of capsules allows you to receive (4x) Four Times the amount of product for (1/4) One Fourth the cost.

We suggest taking 1/4 to 1/2 teaspoon twice daily. With NO known toxic level you can safely take more, if you are not maintaining an alkaline pH. We suggest that you stir it into your favorite juice, water, or yogurt. You can also place it directly under your tongue, where it dissolves in seconds! Taking calcium at bedtime should help promote a more restful nights sleep.

What Are Coral Minerals?

Small invertebrate sea animals build their habitat by producing coral reefs. The inorganic minerals dissolved in the ocean are ingested and secreted by sea animals into organic minerals of the coral reef. The organic minerals are highly absorbable.

There are more than (70+) trace minerals in the human body; all are present in coral. This natural balance is important because all minerals must be present for any one mineral to work properly. When these minerals come in contact with a moist environment like the human digestive tract, they become Ionic or (Charged), which increases their absorption into your bloodstream. This natural ability combined with the full spectrum of coral minerals and the organic formation makes coral one of the most beneficial form of minerals and sets it apart from all other forms of calcium.

How Do Coral Minerals Work?

Minerals are the basic foundation for your health. From your bones to the multitude of enzymatic activities within and without your cells, minerals are the key that will help to build your immune system and vital organs. This is accomplished by supplying the body with missing minerals that have crucial roles to play and by bringing overall mineral levels up, thereby raising the pH of body fluids and tissues back to healthy levels naturally. A high pH (alkaline) is vital because most disease starts & thrives in a low pH (acidic) environment.

People in our society are very mineral deficient because the soils have become depleted through unsustainable farming practices. Toxic chemicals damage or destroy our environment, in turn your family and you. When the proper minerals are supplied in an ionic organic absorbable form, health may improve. Coral contains all minerals needed by the body and has a known synergistic relationship with the body. Coral minerals are essential for the proper function of amino acids, enzymes and every aspect of human health!
